Dear Josh,

It was good talking to you recently. I'm very glad you called, and I appreciate the information about the possible genetics center at Stanford. Today, I sent off some hand written material dealing with a research <sup>program</sup> pre-natal diagnosis. As we ~~agreed~~ agreed, I sent the material to Norman. I have kept one copy of this material which I will bring to Stanford at the end of August.

I also appreciated your comments about Dr. Schulman and the Department of Pediatrics. I wrote to Irving last week.

This is my last week in Oxford. Kay, the kids and I are going to Scandinavia before returning to Stanford. I will see you soon. Josh, I do want to be heavily involved in the genetics center program and in the writing of the application. I told this to Norm. Say hello to Marguerite. Sincerely, Howard
